

SECRET

UNITED STATES GOVERNMENT

Memorandum

TO : Chief, Space Division

DATE: 10 August 1965

FROM : DD/S&D

SUBJECT:

25X1A

1. I suggest that you write a letter to [] on his Note 100 and proceed along the following lines: I have discussed your Note 100 with [] and I think you have the fact substantially correct with the exception of one significant omission. The Career Service Panel did not approve your training request. I understand that the Panel might have looked more favorably on training in the West Coast area; however, there is no assurance that training in that area would have been approved either.

25X1A

2. In order to maintain the tightest possible lines of communications, let me suggest that all your Washington contact either in technical training, administrative or other matters, be passed through me. I will call on Hal or others, as appropriate, for background information and advice. I think this will improve our coordination and also the speed with which things are handled, since I am in the normal pipelines in all these areas.
